

Show all work clearly and in order. Please box your answers. 10 minutes.
--

- What is the dimension of a vector space?
 - The number of possible bases for the vector space.
 - The set of all vectors in the vector space.
 - The number of vectors in the vector space.
 - The span of all the vectors in the vector space.
 - The number of vectors in the span of any set of vectors in the vector space.
 - The number of vectors in a basis of the vector space.
 - None of the above.
- The dimension of the kernel of a linear transformation $T: \mathbb{R}^{90} \rightarrow \mathbb{R}^{10}$ is equal to 5. What is the $\text{rank}(T)$?
 - 5
 - 95
 - 80
 - 85
 - 0
 - 10
- The dimension of the image of a linear transformation $T: \mathbb{R}^{90} \rightarrow \mathbb{R}^{10}$ is equal to 5. What is the dimension of the kernel of T ?
 - 5
 - 95
 - 80
 - 85
 - 0
 - 10
- Let B be a $n \times n$ matrix. Suppose \mathbf{x} is in the null space of B then
 - $B\mathbf{x} = \mathbf{0}$
 - \mathbf{x} must be the zero vector
 - $B\mathbf{x} = \mathbf{y}$ where $\mathbf{y} \neq \mathbf{0}$
 - None of the above.
- Suppose that A and B are $n \times n$ matrices. Show that if \mathbf{x} is in the null space of B then \mathbf{x} is in the null space of AB .
